DETAILED ACTION

1. This Office Action is response to Applicants' AMENDMENT filed on 10/12/2005.
2. Claims 75-77 have been added.
3. Claims 2, 5, 8, 38, 41, 43 and 70 have been cancelled.
4. Claims 1, 3-4, 6-7, 9-37, 39-40, 42, 44-69 and 71-77 are allowed.

Allowable Subject Matter

5. The present application has been thoroughly reviewed. Upon searching a variety of databases, the examiner respectfully submits that claims 1, 3-4, 6-7, 9-37, 39-40, 42, 44-69 and 71-77 are allowed in light of the applicants' argument and in light of the prior arts of made record.

6. The following is an examiner's statement of reasons for allowance:

The claimed invention is directed to a method and a system for generating a schema for a relational database corresponding to a document having a document-type definition (DTD) and data complying with the document-type definition (DTD). A relational schema definition is examined for XML data, a relational schema is created out of a DTD, and XML data is loaded into the generated relational schema that adheres to the DTD. All of the information contained in the DTD is captured in the metadata tables. The metadata tables comprises a metadata item table containing metadata representative of element types in the DTD, a metadata attribute table containing metadata representative of attributes in the DTD, and a metadata nesting

table containing metadata representative of nesting relationships between particles in the DTD.

The closest prior arts, Cheng et al. (hereinafter Cheng) of US Patent No.: 6,519,597 teaches relational extenders for a computer-implemented relational database system. An XML extender for a computer-implemented relational database system is disclosed for storing, querying and retrieving structured documents. While Henninger et al. (hereinafter Henninger) of US Patent No.: 5,499,371 automatically generating source code for constructing relational database schema and transform.

Thus, in combination, Cheng and Henninger fail to teach “storing the metadata in at least three tables comprising a metadata item table, a metadata attribute table and a metadata nesting table” as recited in independent claims 1, 37 & 67.” (Page 13, third paragraph).

These distinct features, in conjunction with all other limitations of the dependents and independent claims render claims 1, 3-4, 6-7, 9-37, 39-40, 42, 44-69 and 71-77 them allowable.

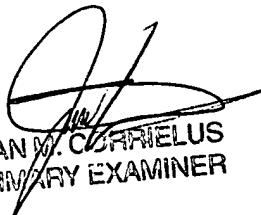

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
